

FOR IMMEDIATE RELEASE

AMP Rx RELEASES THE INTERNATIONAL BROWNBOX

LAUNCHES AT PEACH GUITARS (UK) AND DELUXE GUITARS (AUSTRALIA)

Nashville, TN January 1, 2024 — The popular line voltage attenuator for tube amplifiers, **BrownBox by AmpRx**, is now available in a 220-240V version for international use.

The BrownBox 200 Series is a 220-240 Volt AC, 50 Hz, 2.5 Amp line voltage attenuator and supplies up to 440 Watts. It is available now at Peach Guitars (United Kingdom) and Deluxe Guitars (Melbourne, Australia).

BrownBox is on display and available for dealer order at a special NAMM price at Booth #6021 all week. Meet with company owners and professional musicians Cassandra Sotos, CEO, and Clark Singleton, President, to discover exactly why artists, amp designers and technicians rely on the BrownBox to provide consistent sound, performance and extend the life of their gear. Email sales@brownbox.rocks for more information or to place an order.

The tone and performance of modern and vintage tube amplifiers rely heavily on the input voltage available from the wall or other power source. Variations in input voltage can drastically affect overall sound and performance and can shorten the life of the components, leading to excessive repairs and frustration. The BrownBox by AmpRx allows the user to discover and supply the optimal input voltage for their equipment, get a tone they love, and protect their gear in any environment regardless of the normal variations in voltage. BrownBox provides a consistent basis for the signal chain every single time- guaranteed.

When a tube amplifier is supplied with the proper line voltage, it will sound and respond as originally intended, revealing the circuit's true harmonic content, and preventing unnecessary, expensive, and frustrating repairs.

BrownBox users testify time and again as to how their amp's tone, touch and feel have finally come together, providing them with improved harmonics and dynamic amp performance- allowing them to capture the elusive tone they've always wanted, every time, everywhere. Artists, amp designers, and technicians all agree: every tube amp needs a BrownBox.

Stop by booth #6021 to see the BrownBox in action, talk with the owners, team and artists and see exactly why so many people around the world insist on a BrownBox when they make music.
